1 Mobile Ad Hoc Networks: A cooperative cache architecture in support of caching multimedia objects in MANETs

W. H. O. Lau, M. Kumar, Svetha Venkatesh

September 2002 **Proceedings of the 5th ACM international workshop on Wireless mobile multimedia**

Full text available: pdf(490.39 KB) Additional Information: full citation, abstract, references, index terms

This paper presents a cooperative caching architecture suitable for continuous media (CM) proxy caching in MANET environments. The proposed scheme introduces an **application manager** component, which is interposed between traditional Internet CM applications and the network layer. The application manager transparently performs data location and service migration of active CM streaming sessions so as to exploit nearby data sources based on the dynamic topology of a MANET. We propose two data ...

Keywords: QoS, caching, continuous media streaming, mobile ad-hoc networks, service migration

2 Fast detection of communication patterns in distributed executions

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**

Full text available: pdf(4.21 MB) Additional Information: full citation, abstract, references, index terms

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time diagrams are often used to obtain a better understanding of the execution of the application. The visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

3 Harnessing technology for effective inter- and intra-institutional collaboration (report of the ITiCSE '97 working group on supporting inter- and intra institutional collaboration)

Douglas Siviter, Marian Petre, Bruce Klein

June 1997 **The supplemental proceedings of the conference on Integrating technology into computer science education: working group reports and supplemental**

proceedings
Full text available: pdf(145.01 KB) Additional Information: full citation, references, citings, index terms

4 Harnessing technology for effective inter- and intra-institutional collaboration: report of the ITiCSE '97 working group on supporting inter- and intra-institutional collaboration
Douglas Siviter, Marian Petre, Bruce Klein
October 1997 **ACM SIGCUE Outlook**, Volume 25 Issue 4

Full text available: pdf(2.66 MB) Additional Information: full citation, abstract, references, index terms

The computer science discipline is well poised to provide leading examples of harnessing communications and computer technologies in order to encourage collaborative practices both within and between institutions. Students, academics, and institutions all potentially have access to their counterparts world-wide. This provides endless opportunities for sharing knowledge, accessing scarce expertise, making effective re-use of limited resources, collaborating to attract funding and influence polici ...

5 CORBA based design and implementation of universal personal computing
Mária Törö, Thong Tri Huynh, Jinsong Zhu, Kangming Liu, Victor C. M. Leung
February 2003 **Mobile Networks and Applications**, Volume 8 Issue 1

Full text available: pdf(288.45 KB) Additional Information: full citation, abstract, references, index terms

Universal personal computing (UPC) supports nomadic computing at user mobility and at terminal mobility levels in a user-friendly way. That is, a user can access computing resources anywhere on the Internet, using any available mobile or stationary terminal attached to any subnet supporting UPC services. These services are provided via agents and enable a personalized computing environment that is familiar to or customized by the user and independent of the terminal and subnet, utilizing locally ...

Keywords: CORBA, agents, internet, personalized computing environment, user mobility

6 Component-based software engineering: A support system to COTS-based software development for business services
Stefania Bandini, Flavio De Paoli, Sara Manzoni, Paolo Mereghetti
July 2002 **Proceedings of the 14th international conference on Software engineering and knowledge engineering**

Full text available: pdf(160.45 KB) Additional Information: full citation, abstract, references

The work described in this paper deals with the problem of selecting, configuring, integrating and deploying COTS components to deliver tailored software systems. Since formal and precise description of components is not usually available, a reasonable approach is to augment the available documentation with the informal knowledge derived by practices and experience of experts. The development of a knowledge-based system is a way to organize this empirical knowledge and deliver a tool that can su ...

7 Level II technical support in a distributed computing environment
Tim Leehane
September 1996 **Proceedings of the 24th annual ACM SIGUCCS conference on User services**

Full text available: pdf(5.73 MB) Additional Information: full citation, references, index terms

8 Industrial/government track: Empirical Bayesian data mining for discovering patterns in

post-marketing drug safety
David M. Fram, June S. Almenoff, William DuMouchel
August 2003 **Proceedings of the ninth ACM SIGKDD international conference on Knowledge discovery and data mining**
Full text available: pdf(461.25 KB) Additional Information: full citation, abstract, references, index terms

Because of practical limits in characterizing the safety profiles of therapeutic products prior to marketing, manufacturers and regulatory agencies perform post-marketing surveillance based on the collection of adverse reaction reports ("pharmacovigilance").The resulting databases, while rich in real-world information, are notoriously difficult to analyze using traditional techniques. Each report may involve multiple medicines, symptoms, and demographic factors, and there is no easily linked inf ...

Keywords: association rules, data mining, empirical Bayes methods, pharmacovigilance, post-marketing surveillance

9 Defining factors, goals and criteria for reusable component evaluation
Jyrki Kontio, Gianluigi Caldiera, Victor R. Basili
November 1996 **Proceedings of the 1996 conference of the Centre for Advanced Studies on Collaborative research**
Full text available: pdf(107.40 KB) Additional Information: full citation, abstract, references, index terms

This paper presents an approach for defining evaluation criteria for reusable software components. We introduce a taxonomy of factors that influence selection, describe each of them, and present a hierarchical decomposition method for deriving reuse goals from factors and formulating the goals into an evaluation criteria hierarchy. We present some highlights from two case studies in which the approach was applied. The approach presented in this paper is a part of the OTSO method that has been de ...

10 Integrating tools and tasks: UMEA: translating interaction histories into project contexts
Victor Kaptelinin
April 2003 **Proceedings of the conference on Human factors in computing systems**
Full text available: pdf(232.45 KB) Additional Information: full citation, abstract, references, citings, index terms

Virtual environments based on the desktop metaphor provide limited support for creating and managing project-specific work contexts. The paper discusses existing approaches to supporting higher-level user activities and presents a system named UMEA (User-Monitoring Environment for Activities). The design of the system is informed by activity theory. The system: (a) organizes resources into project-related pools consisting of documents, folders, URLs, and contacts, (b) monitors user activities, (...

Keywords: activity theory, interaction histories

11 Bandwidth and traffic estimation techniques: A methodology for estimating interdomain web traffic demand
Anja Feldmann, Nils Kammenhuber, Olaf Maennel, Bruce Maggs, Roberto De Prisco, Ravi Sundaram
October 2004 **Proceedings of the 4th ACM SIGCOMM conference on Internet measurement**
Full text available: pdf(1.08 MB) Additional Information: full citation, abstract, references, index terms

This paper introduces a methodology for estimating interdomain Web traffic lows between all clients worldwide and the ervers belonging to over one housand content providers. The idea is to use the server logs from a large ontent Delivery Network (CDN) to identify client

downloads of content provider (i.e., publisher) Web pages. For each of these Web pages, a client typically downloads some objects from the content provider, some from the CDN, and perhaps some from third parties such as banner ...

Keywords: analysis, estimation, interdomain, traffic demand, traffic matrix, web

12 Distance education: A perspective on fulfilling the expectations of distance education
Mariana Hentea, Mary Jo Shea, Lisa Pennington
October 2003 **Proceeding of the 4th conference on Information technology curriculum**

Full text available: pdf(254.59 KB) Additional Information: full citation, abstract, references, index terms

This paper discusses current and future expectations of distance education, as well as methods of achieving these goals. Distance education offers freedom from space and time constraints, increased interactivity, improved delivery of multimedia, broadened curricula, and personalized learning. However, not all distance education programs achieve these expectations. Lack of staff training and support, inadequate course design, lack of software, improper use of emerging technologies, inappropriate ...

Keywords: artificial intelligence, distance learning, hybrid learning

13 Building an intranet in the laboratory
Bruce P. Tis
April 2000 **Journal of Computing Sciences in Colleges , Proceedings of the fifth annual CCSC northeastern conference on The journal of computing in small colleges**, Volume 15 Issue 5

Full text available: pdf(38.58 KB) Additional Information: full citation, references, citings, index terms

14 Integrating legacy systems with modern corporate applications
Paul Robertson
May 1997 **Communications of the ACM**, Volume 40 Issue 5

15 DEVise: integrated querying and visual exploration of large datasets
M. Livny, R. Ramakrishnan, K. Beyer, G. Chen, D. Donjerkovic, S. Lawande, J. Myllymaki, K. Wenger
June 1997 **ACM SIGMOD Record , Proceedings of the 1997 ACM SIGMOD international conference on Management of data**, Volume 26 Issue 2

Full text available: pdf(1.61 MB) Additional Information: full citation, abstract, references, citings, index terms

DEVise is a data exploration system that allows users to easily develop, browse, and share visual presentation of large tabular datasets (possibly containing or referencing multimedia objects) from several sources. The DEVise framework is being implemented in a tool that has been already successfully applied to a variety of real applications by a number of user groups. Our emphasis is on developing an intuitive yet powerful set of querying and visualization primitives that can be ...

16 Representing compatibility and standards: a case study of Web browsers
Giancarlo Succi, Paolo Predonzeni, Andrea Valerio, Tullio Vernazza
June 1998 **StandardView**, Volume 6 Issue 2

Full text available: pdf(1.13 MB) Additional Information: full citation, references, index terms
